August 27th, 2024

Dear Mayor Zebian,

As you are aware, The Avon Street Erosion Society has been very engaged gathering information related to our erosion and climate impact along the Avon River riverbank, both in Hantsport and Hants Border. We continue to be actively investigating multiple possibilities for mitigation, including innovative options such as Geotubes, nature based solutions and also hard armour stone.

With funding opportunities hopefully becoming available with the Provincial Sustainable Communities Challenge Fund, we are looking for a letter from you outlining your support. We have been advised that these letters of support will be very advantageous to our application and be most helpful in achieving a favourable outcome.

We, the Avon Street Erosion Society, would like to formally request this letter of support to add to our portfolio as we move forward to meet the requirements of the upcoming application.

In closing, we kindly thank you for your continued support.

Kind regards,

Avon Street Erosion Committee
